

12 Point Moravian Star Class

Instructor: Jamie Covino

Class Description:

Spend the day making a 12 pointed, three-dimensional Moravian star. It is said that these originated as a geometry lesson for young boys in Germany. Who says you can't learn geometry while having fun!

This intermediate class will give students the opportunity to work with the Morton Cutting System and Beetle Bits Cutting System. Glass (Spectrum, Clear Waterglass) will be included in the class. Students should have supplies purchased before class starts and arrive on time.

| Students are required to bring: | Recommended by Instructor: |
